Nationwide
Sales & Service

60 Hoppers Road London N21 3LH
Registered in England No: 1821134 VAT No: 415015303

64BIT Compatibility

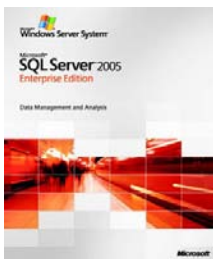

ActIn Time 2011 is fully compatible with 64BIT Processors.

64-bit

Database Type

Upgraded or thinking of upgrading to SQL 2005 / SQL 2008? ActIn Time is now fully compatible.

Reporting Engine

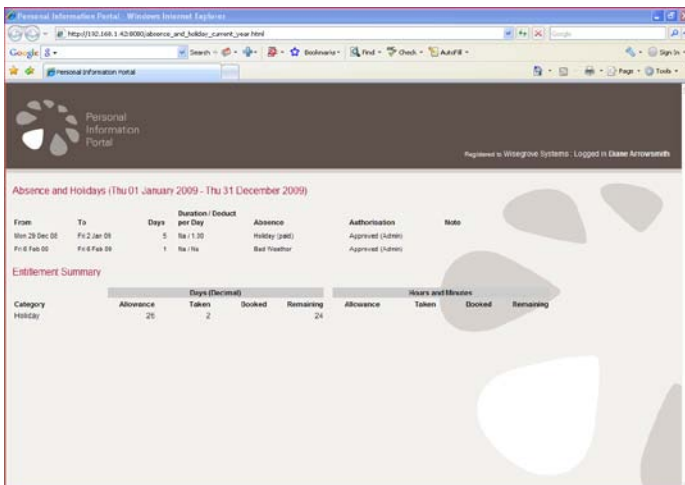

ActIn Time now uses Crystal Reports V11

Crystal Reports

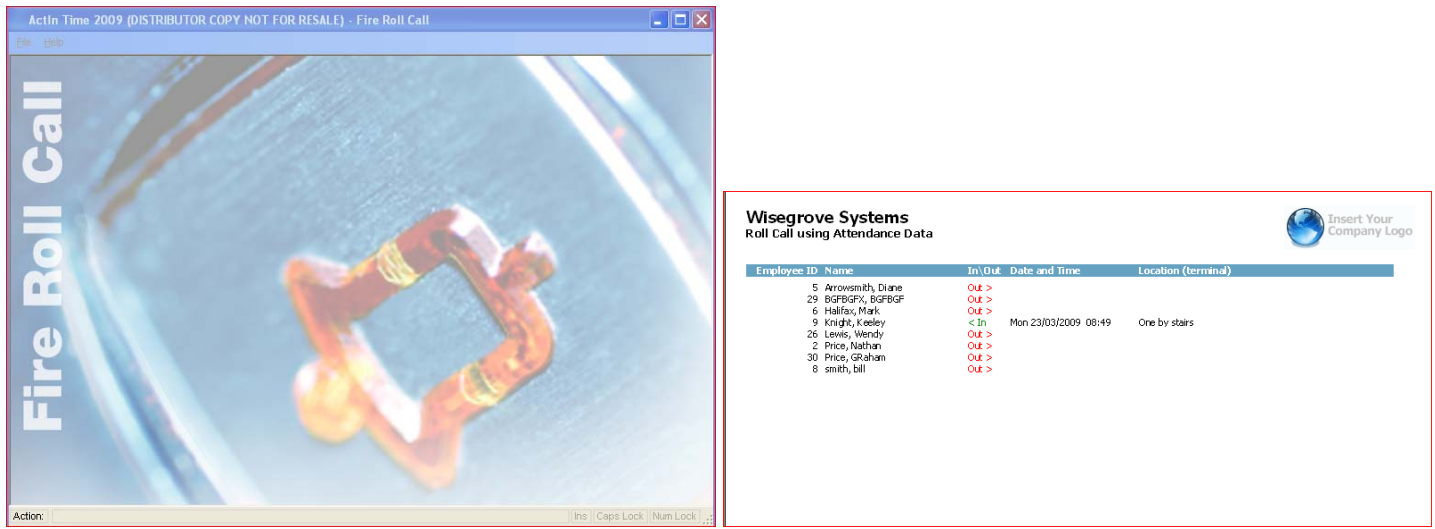

Personal Information Portal

The Personal Information Portal has been re-written in HTML. This provides a faster & more reliable link. You can also select the Absence entitlement you wish to display instead of the employee seeing irrelevant sections.

Automated Fire Roll Call

A new fire roll call event handler has been created; this is a communication engine dedicated to listening out for fire triggers from a fire alarm to the new fire roll call module. The roll call can now print out as quickly as 30 seconds depending on network speeds etc.

Wisegrove Systems
Roll Call using Attendance Data

Employee ID	Name	In/Out	Date and Time	Location (terminal)
5	Arrowsmith, Diane	Out >		
29	BGFBSFX, BGFBSGF	Out >		
6	Halliday, Mark	Out >		
9	Knight, Keeley	< In	Mon 23/03/2009 08:49	One by stairs
26	Lewis, Wendy	Out >		
2	Price, Nathan	Out >		
30	Price, Graham	Out >		
8	smith, bill	Out >		

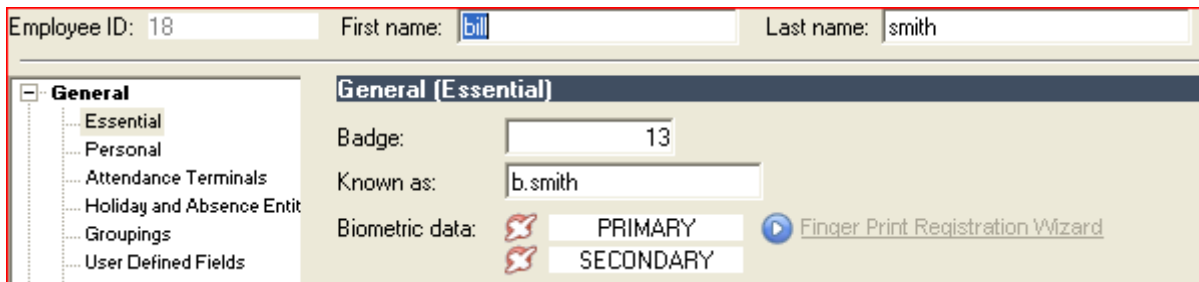

Added 'HandPunch' terminal compatibility

The software is now fully compatible with the Ingersol Rand handscanners.

Biometric Template Movement

Customers with multiple handscanners or fingerprint terminals can now benefit from template movement. Register a hand on one terminal & the event handler will pass the template down to the relevant predefined units that the employee has permission to use.

Employee ID: 18 First name: Last name:

General (Essential)

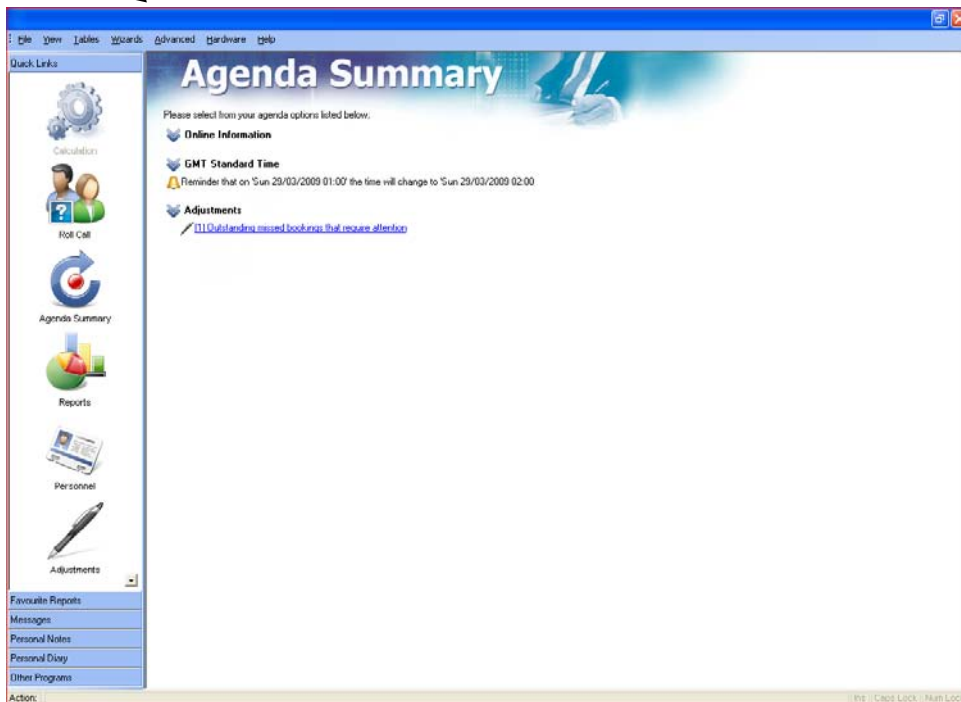

Badge:

Known as:

Biometric data: PRIMARY SECONDARY [Finger Print Registration Wizard](#)

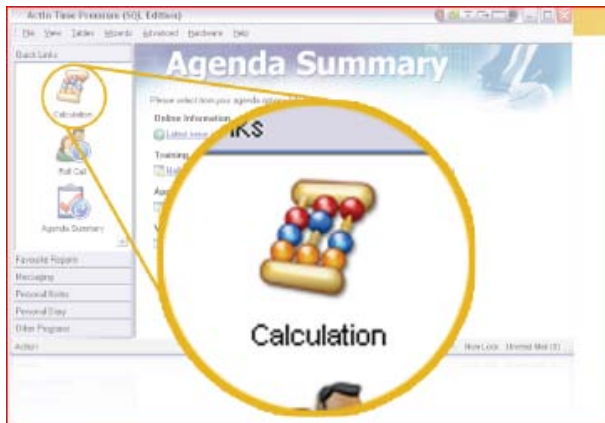

Combined Administration & Client Screen

The Administration, client, & hardware settings have now been merged. This prevents confusion as to which application is needed for certain tasks. There is no longer a need for administrators to have a separate user account when wanting to view shifts & adjustments.

Calculation Button

A button click has been set up for smaller companies that wish to shut the system down in the evenings or at weekends. This will collect & calculate clockings as & when needed.

Dongle Registration

The use of a USB Dongle has been introduced; this removes the issue with having to reregister the software following large software updates/upgrades.

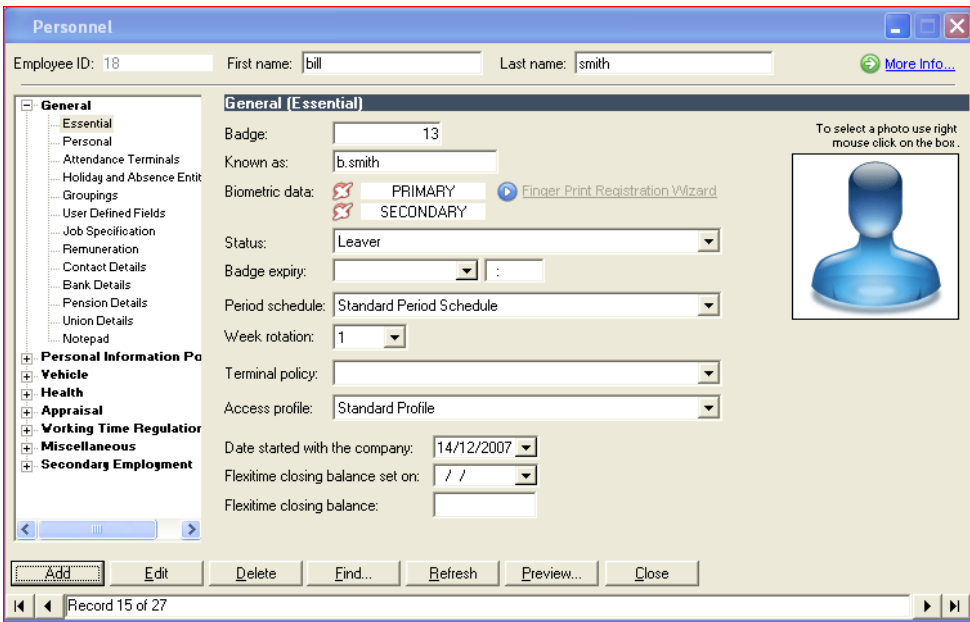

Free Report Designer

Ever wanted to make alterations to existing reports, or even design your own? The software now comes with a free report designer, previously sold separately at £595 + VAT.

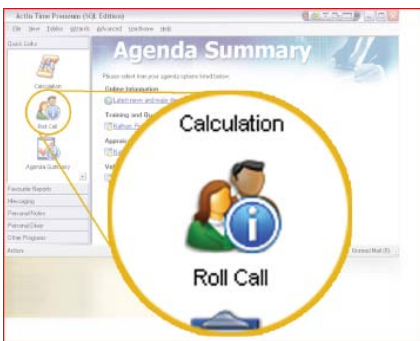

Essentials Screen

Mandatory / essential field when adding an employee are now in one section of personnel rather than being scattered around in several sections.

Roll Call Button on Agenda Screen

Printing a roll call is a button click away from the agenda screen.

Integrated / Functional Calendar in adjustment screen

The calendar on the left hand side in the adjustment screen is now fully interactive. You can now make adjustments, check, book & delete absences all within the same screen. You can also check absence statistics in the adjustment screen.

The screenshot shows the 'Adjustments' window for employee 'bill smith'. On the left is a calendar for March 2009. The main area displays a table of absence adjustments for the period from Mon 23 Feb 2009 to Sun 01 Mar 2009. The table includes columns for Wk/Day, Date, Schedule, Taken absence(s), First/last swipe, Total, Basic, Time 1/3, Time 1/2, D/Time, Holiday, Flex, and Bonus.

Wk/Day	Date	Schedule	Taken absence(s)	First/last swipe	Total	Basic	Time 1/3	Time 1/2	D/Time	Holiday	Flex	Bonus

1 Sun	01/03/2009	Wisegrove SUN		??:??..??:??(0)	??:??							

Additional Reports

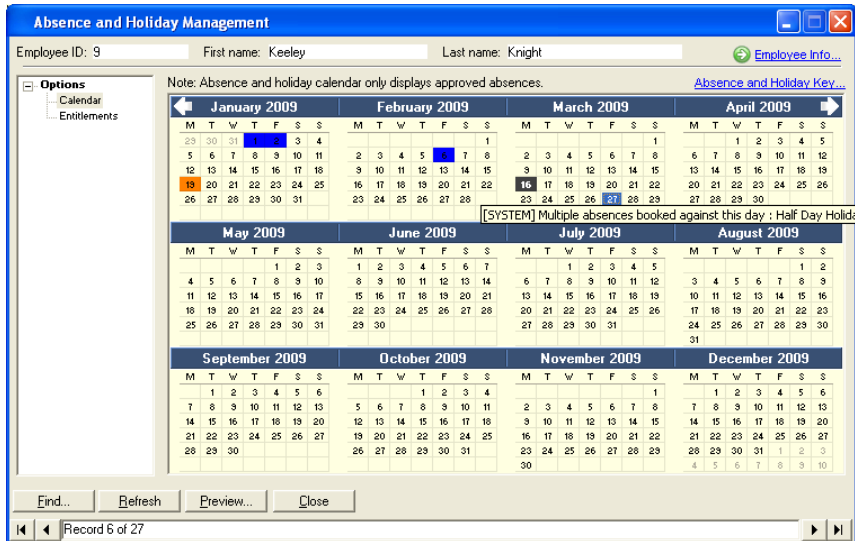

A number of reports have been introduced or modified to assist the end user.

The screenshot shows the 'ActIn Time Reports' window. It features a tree view of 'Report Templates' on the left and 'Accessible Reports' on the right. The 'Accessible Reports' list includes various reports such as 'Absence Entitlement Summary', 'Absence Entitlement', 'Absence Listing with Notes', 'Access Data Listing (Everything)', 'Actual Absence Time Taken', 'Archived Hours (Decimal)', 'Bookings', 'Bradford Factor', 'Employees Missing from Daily Schedule', 'J&E Absence and Lateness Forecast', 'Pay Period Totals (Decimal)', 'Personnel Details', 'Roll Call using Attendance Data', 'Total Daily Hours Over Date Range', 'Weekly Clock Card', and 'Yearly Absence Planner'.

- Badge Name and Phone No
- Missed Bookings (No Unauthorised)
- Flexitime End of Period
- Weekly Hours (first and last swipe)
- Weekly Hours Worked
- Total Daily Hours Over Date Range
- Archived Hours up to 16 Bookings
- Archived Hours up to 16 Bookings (Decimal)
- Flexitime Closing Balance For Specified Report

Highlight multiple absences for 1 day on Calendar

It was difficult to spot days with multiple absence bookings; the adjustment calendar & the absence & holiday calendar will now highlight this.

Faster terminal speed & upgrade firmware via software

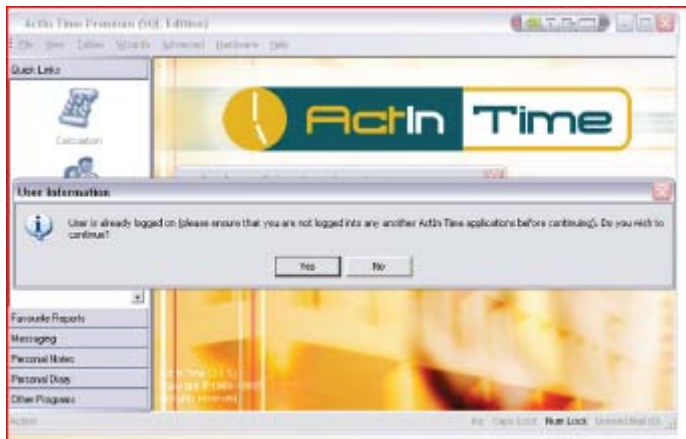

The new V9 range of clocking terminals communicates using 100/100 baseT, as apposed to 10 baseT on the old terminals. They are now completely upgradeable via software upgrades due to the built in flash memory.

WHY NOT UPGRADE YOUR EXISTING TERMINAL TO V9 VIA ONE SIMPLE BOARD CHANGE?

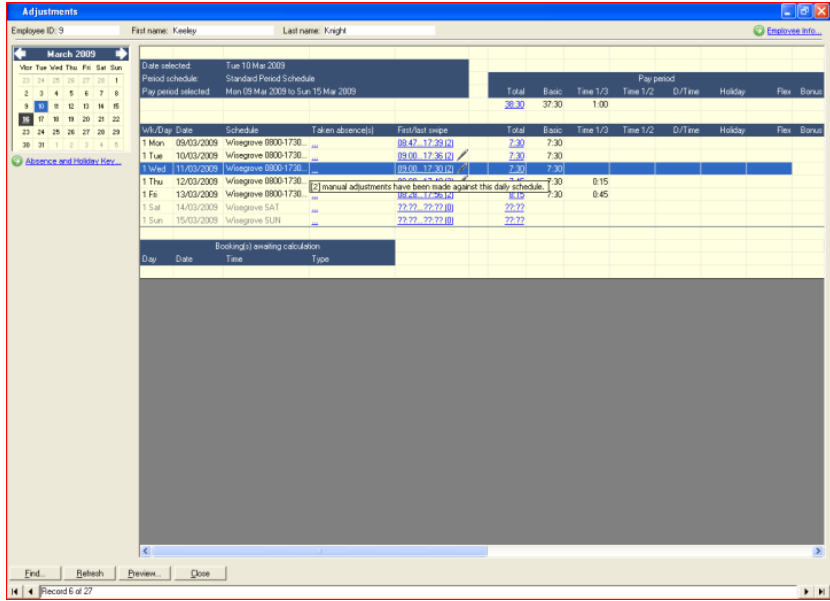

Amended user already logged on

Users no Longer have to ask an administrator to log them off if they have crashed out of the application.

Improved Adjustment screen interaction

Icons have been added to the adjustment screen for core time infringements, manual adjustments, notes & overridden totals.

Company Logo on reports

Personalise your reports by adding your own company logo.

Biometric Access Control

Improve site security with biometric access control. Handscan & fingerprint options are available.

Fingerprint registration using the new 't8-0070 Desktop Biometric Reader

Adding a fingerprint could not be simpler utilising the new USB 't8-0070 Desktop Biometric Reader. Enrol employees at your desktop rather than in a noisy factory environment.

Collapsible Agenda

The collapsible agenda keeps your screen nice & tidy.

Agenda Summary

Please select from your agenda options listed below;

Zone 1: Administration (Count 8)				

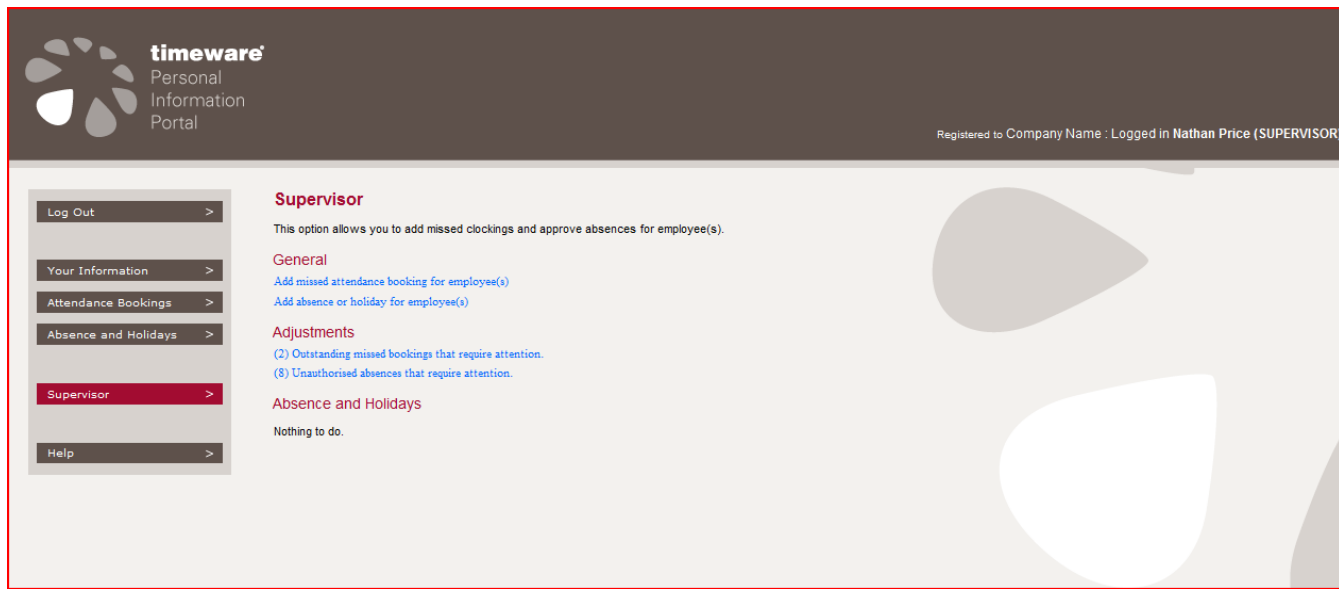

Mustering

Access points can be set up as muster points. In the event of an emergency employees can clock at their nearest muster point (fire point), pre-configured emergency roll call reports can be set to show people who have, and haven't reported in safely.

Enhanced Web Portal

Supervisors and managers can now add missed bookings and manage absences over the Internet without installing the main application.

Email Facility

This is an exciting new feature that can provide innumerable possibilities. Automated emails can be generated by the event handler to key personnel, such as this week's absences, outstanding adjustments etc. Employees can request absence entitlement at their clocking point & then request that it is emailed all by the touch of a button.

Backward compatibility with timeware 5 terminals

This feature has been included for customers that wish to benefit from the exciting new software features but have a limited budget in a difficult financial environment. Features may be restricted such as business absences at the terminal etc.

Windows 7 Compatible

Email Agent

Previously, an employee was notified via word of mouth if an absence request was accepted or declined. Not any more!!! Provided that a POP3 mail account is in place, the email agent will automatically message an internal or private employee email address.

Fed up of constantly having to correct missed bookings because staff forget to clock? Provided that a POP3 mail account is in place, the email agent will automatically message an internal or private employee email address with adjusted bookings. If correct control measures are put in place, an employee can see that they are being monitored & become aware that it is not acceptable.

---	---

Combined Handscan & Fingerprint compatibility

This new feature allows a customer to have a mixture of Handscan terminals, fingerprint terminals & biometric access control.

First name: Last name:

General (Essential)

Badge:

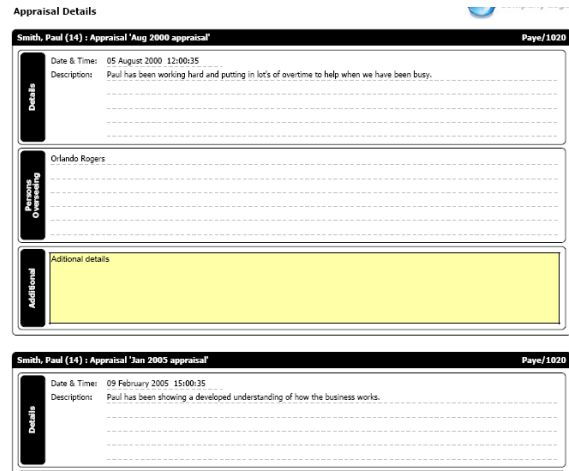

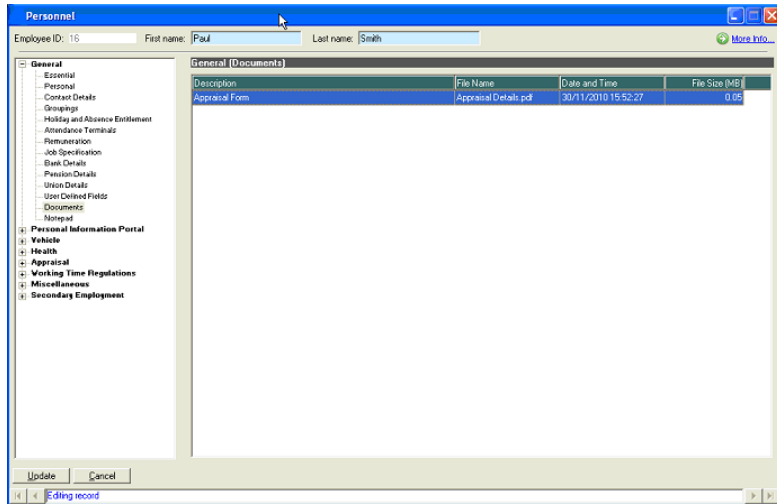

Known as:

Biometric data:

<input checked="" type="checkbox"/>	Finger	<input type="button" value="Remove"/>
<input checked="" type="checkbox"/>	Hand	<input type="button" value="Remove"/>

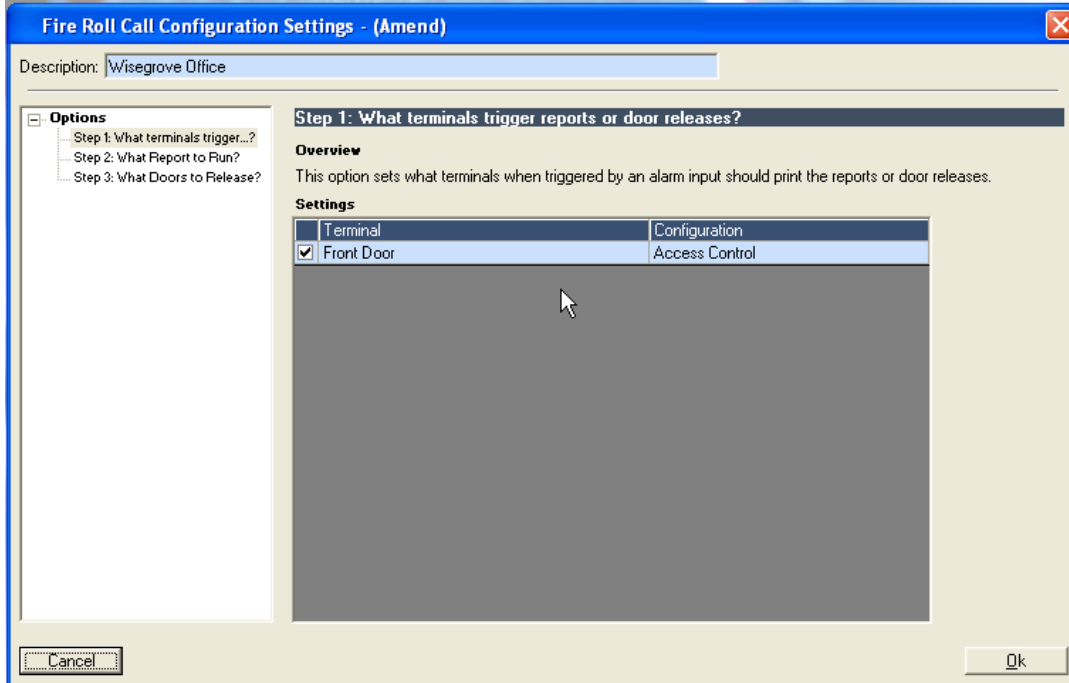

Personal document storage in SQL database

Scanned documents such as Driving Licence, Appraisal Form and Signed Contract of Employment can be stored in the database instead of shared folders that could be blocked for other users.

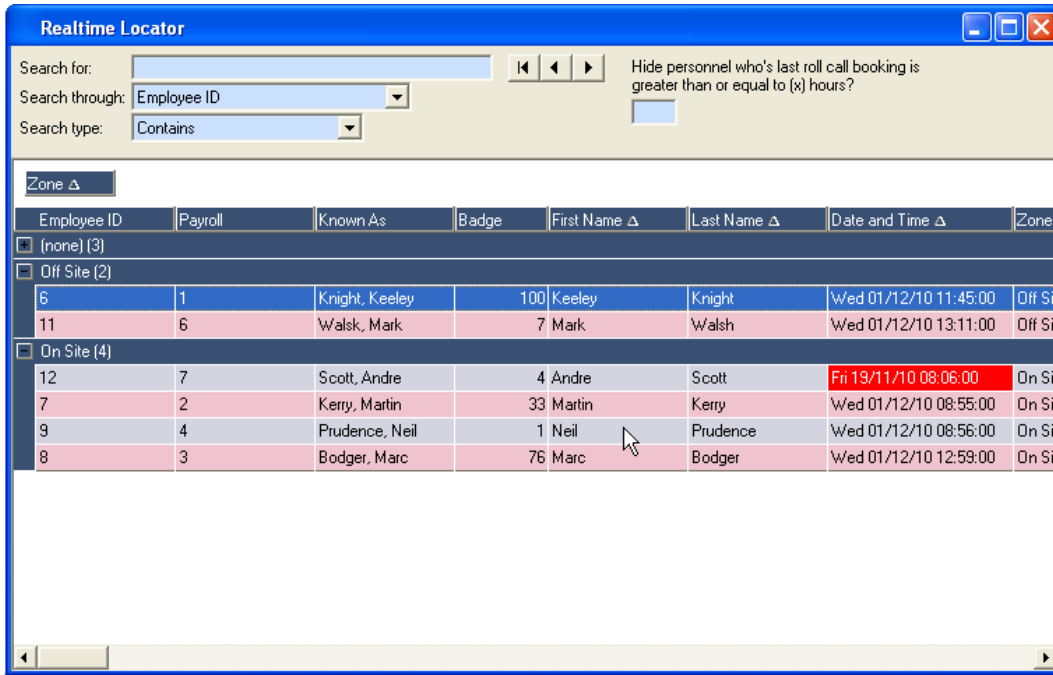

Enhanced Fire Roll Call Agent

This is a new cost saving feature that eliminates the additional expense of cabling from a fire alarm to every door controller. In the event of a fire not only will the system automatically print a roll call report, it will automatically release preconfigured doors located in fire exit routes.

Employee Locator

The new Employee Locator module can be used to monitor an employee's movement between access zones. This can also be combined with the use of muster points.

Realtime Locator

Search for: << < > >> Hide personnel who's last roll call booking is greater than or equal to (x) hours?

Search through: Employee ID Search type: Contains
